

PREPARATION GUIDE

To ensure your goods are re-delivered in their original condition, here are some key points to consider in preparation for loading your TAXIBOX.

- 1 Use correct packaging materials.** Be extra careful that items don't move during transit by carefully restricting their movement by using the correct packaging materials.
- 2 Use our Inventory List to sort the items you are packing and storing.** This will help you find an item if you are looking for it while it's in storage or when unloading.
- 3 Put as much as you can into boxes.** Boxes provide greater protection for your belongings and will make loading and unloading your TAXIBOX easier. Fill each box to its capacity, using packing paper or fillers to eliminate empty spaces.
- 4 Tape the bottom of each box for added strength.**
- 5 Please ensure that no liquids, foods or perishable goods** are stored in your TAXIBOX. Make sure that fridges and freezers have been defrosted (and emptied!) before loading into the TAXIBOX.
- 6 Protect metal items from rust** by wiping metal items with a rag dipped in oil to protect them.
- 7 Label box** on all sides to make unpacking easier.
- 8 Please Note:** Whilst removalists offer a service to load your TAXIBOX, you will need to make sure that your belongings are properly packed and protected in advance

We've also included our TAXIBOX Packing Guide (Waiting for you in your TAXIBOX) - make sure to check it out!
